Pathways: A Century of Women at RIT project materials contains flyers, exhibition cards, and student projects generated for this project. The collaborative project took place during the 2007-08 academic year which culminated in a day-long symposium featuring students reading papers and poems and an exhibition opening.

The items listed below were collected by the RIT Archivist, Becky Simmons who was a member of the steering committee. These are an example of some, but not all of the student projects that came out of this collaborative effort.
