Records of the Rochester Institute of Technology's Chester F. Carlson Center for Imaging Science. The Center for Imaging Science (CIS) was founded in 1985 as a college that could provide students with the option of enrolling in imaging science. This highly interdisciplinary major consists of mostly physics, math, and computer science. These records include slides, a videotape, promotional materials, clippings, memos, and academic reports.

## Box 1

- **Folder 1:** Slides & Videotape
  - 1 videotape titled "Development of a True, Solid State, 3-Dimensional Display" by Dr. Elizabeth Downing 4/20/1998
  - 99 slides of imaging science, faculty, staff, and RIT campus buildings
- **Folder 2:** Promotional materials 1987-1999
  - Building plans, building dedication, research activities, open house, summer courses, brochures and mailers.
- **Folder 3:** Academic reports 1988-1994
  - Academic reports, academic programs and faculty research projects, and memos.
- **Folder 4:** Industrial Associates Meetings & Presentations 1989, 1996-1999
  - Meeting schedules and research presentation lists.
- **Folder 5:** Clippings 1970-1991
